Dear Mr. Vogelsang,

Sorry not to have been able to respond to your thoughtful letter of the 30th and the enclosures I'm glad to have. A combination of extremely heavy preparations for FOIA suits and limitations imposed by a post-phlebitic syndrome have slowed be some.

I'm glad to have and to have read the Brown-Acoca article, of which I'd heard.

I knew the story. I know Brown and of Acoca. Because of their political preconceptions they are blinded to the realities of the kinds of operations of which they write. Those anti-Castros were incompetents and con men, all longing for fame and self-esteem and none having the backing claimed.

Morrow is a faker. His book is a fraud. There are a number like it. And those Dealey Plaza pictures have been blown into meanings they do not and cannot have. They thus deceive people like you. I can see how you see resemblances I do not but were it the case it would lack meaning. Sorry I don't have time for the details but I know of no reason to give those pictures <u>any</u> meaning.

The AIB people may go for it because they'll do anything to get themselves attention. I know the Anderson people will not. If they saw any possibility the chances are they'd have checked it with me. They have not. I'm sure this is the reaction of the newspapers. They see no connection because even if they did agree that the men resemble each other there is no connection with anything.

Sorry I can't take time for more explanations.

I do appreciate the time and the copies.

Sincerely,
